SUMMARY

I have a degree in Production Engineering and a Master's in Applied Economics. During my undergraduate studies, I was involved for two and a half years in scientific research, resulting in three congress papers and process improvements for two companies. I improved my English and Excel skills and learned about investment analysis and project management during a two-year internship at a multinational steel company. For my Master's degree in Applied Economics, I wrote a thesis on labor economics and technology, co-advised by renowned experts. I also worked as a teaching assistant for graduate and undergraduate students. I conducted research with confidential data in collaboration with a technology company and developed skills in R software. Currently, I am a research assistant for two professors at Yale and the George Washington School of Business.

EDUCATION

Universidade Federal de Juiz de Fora

PhD, Applied Economics

Juiz de Fora, Brazil

2024 - 2028

Universidade Federal de Juiz de Fora

Master's Degree, Applied Economics

Juiz de Fora, Brazil

2022 - 2024

Instituto Federal de Minas Gerais (IFMG)

Degree, Production Engineering (or Industrial Engineering)

Congonhas, Brazil

2016 - 2021

RESEARCH EXPERIENCE

Research Assistant (Part time)

Current Position

- Conducting research supervised by Mayara Felix (Yale University) and Rodimiro Rodrigo (George Washington School of Business).
- Data manipulation, staggered difference-in-differences estimation, and other research assistance tasks.

Data Analysis

Large-Scale data and Economic Analysis

- Worked with Brazil's RAIS database (over 100 million records annually) to analyze labor market dynamics
- Partnered with technology company to analyze firms datasets
- Applied panel data methods to assess technology's impact on labor markets
- Conducted input-output analysis of industrial sectors

Presentations

National and International Conferences

- 29th Annual LACEA Meeting (Montevideo, 2024)
- 52º Encontro Nacional de Economia (Natal, 2024)

RESEARCH

Interests: Labor economics, technology and econometrics.

Publications

Remote work, real effects: The impact of telework on Brazil's sectoral structure, with Nascimento, M. H. S. and Perobelli, F. S. *Journal of Economic Studies*, p. 1-15, 2026.

Working Papers

The Heterogeneity of Organizational Structure Changes in Brazilian Firms with the Arrival of the Internet, with Corseuil, C. H. L. and Freguglia, R. S.

ADVISING

Undergraduate thesis

Desigualdade De Gênero: Uma Análise Das Habilidades Nos Diferenciais Salariais. Ambrosim, A. L. S

Co-advisor

2025

Teach Assistant

Graduate Program in Applied Economics

- * Labor economics I and II
- * Microeconomics

UFJF

2023 - 2025

EXPERIENCE

Vallourec Soluções Tubulares do Brasil S.A

Intern

- * Responsible for the project's follow-up.

- * Analysis of profitability calculation.

- * Presentations with the international team.

- * Over two years, I had high contact with inside projects, portfolio management and FEL's phase of PMBoK.

Jeceaba, Brazil

Apr. 2018 – Feb 2020

SKILLS

R: Econometrics, panel data, input-output, geographic analyses with *ggplot2*, analysis of complex survey data with *survey*.

Excel: Profitability, macros, complex formulas and applied economic tools.

STATA, MatLab and Python

Developer Tools: Git, Google Cloud Platform

Data: RAIS (formal labor workforce data from Brazil), PNAD (household sample survey)

Languages: English, Portuguese (native)

SCOLARSHIPS
